

pRetro-E2-His

Cat.No.	Unit
E-517	10 µg
Cat. No.	E-517
Name	pRetro-E2-His
Unit	10 µg
Description	Retroviral gene transfer is a widely used technique for efficient introduction of genes into the genome of any dividing cell type for stable expression. abm's Retro-Easy™ retroviral expression systems provide a quick and easy way of producing high titer recombinant retroviruses for efficient gene transduction. The Retro-Easy-His™ Expression System is a complete retroviral expression system with the pRetro-E2-His vector.
