Hygromycin B

Cat.No.	Unit
G265	1.0 g

Cat. No.	G265
Name	Hygromycin B
Unit	1.0 g
Category	Buffers & General Chemicals
Description	Hygromycin B is an aminoglycoside produced by <i>Streptomyces hygroscopicus</i> bacteria. This antibiotic kills fungi, bacteria, and even eukaryotic cells by blocking protein synthesis. Hygromycin B is often used in order to select for and sustain eukaryotic and prokaryotic cells that contain the hygromycin resistance gene.
Storage Condition	Stable up to 1 year at -20°C.

Caution: This product is for research use only and is not intended for therapeutic or diagnostic applications.

Please contact a technical service representative for more information (1-866-757-2414).
